

- Interior and exterior.
- No primer* or undercoat needed.
- Save time and money.
- Microporous, low VOC and environmentally friendly.
- Use on wood, MDF, metals, plastics, tiles, masonry, plaster, UPVC, galvanised steel, aluminium, copper and radiators.
- Gloss, Satin and Matt in various colours.

- Tough and durable with excellent colour retention.
- Use on wood, galvanised steel, plastic, concrete, brick and cladding.
- Easy to apply.
- Excellent resistance against cracking, blistering and flaking.
- Prevents rot and algal build-up.

- Protects and enhances the substrate.
- Eases removal of dirt, dust, oil and grease.
- Used for identification of specific areas.
- Reduce dusting, which causes damage to electrical equipment.
- Contains a micro aggregate to give slip resistant properties.
- Suitable for new concrete.

- Stretches up to 400%.
- Smooth finish.
- Long lasting.
- Microporous.
- Flexible.
- Fine crack bridging.
- Apply with brush, roller or spray.
- Water-based and quick drying.

- Smooth matt finish.
- Fine crack bridging.
- Save time and money.
- Excellent coverage.
- Flexible, microporous and breathable.
- Wipeable when dry.
- Brush, roller or spray application.
- Low odour.
- Easy application.
- Quick drying.

- Flexible roof coating.
- Easy to apply.
- Waterproof.
- Quick drying.
- Highbuild.
- Seamless.
- Ultraviolet protection.
- Long life durable coating.
- Reduces maintenance costs.
- Suitable for application to many surfaces.

ONE PAINT DOES IT ALL

- Water-based
- Microporous
- Breathable
- Low VOC
- Flexible
- Environmentally Friendly
- Excellent Durability
- Gloss, Satin and Matt
- Long Lasting

- Radiators
- Tiles
- Melamine
- Masonry
- Plastics
- Galvanised Steel
- Wood
- Metals*
- Plaster
- Fibreglass
- and more

**NO PRIMER* OR UNDERCOAT REQUIRED
SAVE TIME AND MONEY**

FEATURES AND BENEFITS:

- Use inside or out
- Resists flaking and cracking
- Retains gloss for longer
- Chalks much less
- Water-based
- No special thinners required (only water)
- Low VOC
- Microporous & breathable
- Alkali resistant
- Resists heat up to 80°C
- Quick drying
- Non flammable
- Cleans up with water
- Saves time and money
- Recoatable after 4 hours
- Can be used over most other old paints
- **No primer required***
(*unless on mild steel - use BEDEC Metal Primer, where staining can occur - use BEDEC Stain Block)
- **No undercoat required**

WHAT IS MSP?

MSP is a proven, water-based paint that resists flaking or peeling because of its outstanding flexibility. It will go over most other paints and varnishes including weathered Tar Varnish, Bitumen and Creosote. It is non-yellowing and it cleans up with water.

It can be used directly onto plastic, wood, metal (including radiators), plastic coated steel, cladding, brick, masonry, fibreglass, terracotta, stone, plaster, MDF, tiles, melamine, plastics, UPVC, galvanised steel, aluminium, copper and much much more!

Preparation of all surfaces is very important. Shiny surface need to be keyed. Thin the first coat 20-30% with water on porous surfaces.

Coverage: Approximately 13-15 sq. metres per litre, depending on substrate porosity and application method.

Drying times: Dry in 2-4 hours, recoatable after 4 hours.

Available in 750ml and 2.5litre, 250ml, 5litre and 20litre packs (selected range).
